

ZMM 1 ... ZMM 200

Silicon Planar Zener Diodes

in MiniMELF case especially for automatic insertion. The Zener voltages are graded according to the international E 24 standrad. Smaller voltage tolerances and higher Zener voltages on request.

These diodes are also available in DO-35 case with the type designation BZX55C...

These diodes are delivered taped.
Details see "Taping".

¹⁾ Tested with pulses $t_p = 20$ ms.

²⁾ Valid provided that electrodes are kept at ambient temperature.

³⁾ The ZMM1 is a silicon diode with operation in forward direction. Hence, the index of all parameters should be "F" instead of "Z". Connect the cathode electrode to the negative pole.
