Coding - polarization

To avoid cross-plugging problems in applications requiring the use of more than one MIL-DTL-38999 II connector of the same size, alternate key-rotations are available as indicated in the chart below. As shown in the accompanying diagram, the major key rotates clockwise from the secondary ones.

In the reference system, the polarization is shown by the letters A, B, C or D.

Hermetic receptacles

Presentation

Hermetic receptacles JT-Y are used when a pressure differential is applied on one or the other side of the panel.

Main characteristics

- 9 shell sizes (tin plated carbon steel)
- Tinned solder pin contacts (for PCB contacts, please consult us)
- Contact plating in active zone: gold
- Glass insert
- Interfacial seal
- Air leakage $< 1.10^{-7}$ cm³/s under 1 bar of pressure differential
